256 Logistics Compliance Hub

App Concept

256 Logistics Compliance Hub is a transport-specific compliance management system designed for UK HGV operators. It combines HR, Home Office sponsor compliance, DVSA fleet compliance, driver training, maintenance records, and legal evidence into one controlled platform.

The purpose of the app is not only to manage staff and vehicles, but to prove that 256 Logistics has proper control over:

- Employees and sponsored workers
- Driver training and competence
- Vehicle maintenance and roadworthiness
- Defects and VOR decisions
- Tachograph and driver compliance
- Home Office reporting duties
- DVSA and Traffic Commissioner evidence

Main App Name Options

Preferred Name

256 Logistics Compliance Hub

Alternative Names

1. **256 Transport Control Centre**
2. **256 Compliance Command**
3. **256 Fleet & People Compliance System**
4. **256 Operator Compliance Hub**
5. **256 Roadworthiness & Workforce Manager**

Main Dashboard

The first screen after login should be a management dashboard.

Dashboard Cards

1. People & Compliance

Shows:

- Total employees
- Sponsored workers
- Right to Work checks due
- Visa expiry alerts
- Absence alerts
- Contracts missing
- Emergency contacts missing

2. Safety & Competency

Shows:

- Training overdue
- Driver induction incomplete
- Policy acknowledgements missing
- Refresher training due
- CPC expiry alerts
- Toolbox talks pending

3. Fleet & Roadworthiness

Shows:

- Total vehicles
- Active vehicles
- Vehicles VOR
- PMI due soon
- MOT expiry alerts
- Insurance expiry alerts
- Open defects
- Brake test due

4. Driver Risk

Shows:

- Tachograph infringements
- Missing mileage alerts
- Missed walk-around checks
- Licence checks due
- High-risk drivers
- Driver debriefs pending

5. Audit Evidence

Shows:

- Home Office audit pack status
- DVSA audit pack status
- Traffic Commissioner evidence file
- Missing documents
- Management sign-offs pending

Module 1: People & Compliance

This replaces a basic HR system like BrightHR and makes the HR side more suitable for transport, DVSA and Home Office compliance.

Employee Profile

Each employee should have a complete profile containing:

- Full name
- Date of birth
- Home address
- Phone number
- Email address
- Emergency contact
- Next of kin
- Job title
- Department
- Start date
- Employment status
- Contracted hours
- Salary
- Work location
- Line manager
- Assigned vehicle, if applicable

Employment Documents

Upload and store:

- Employment contract
- Offer letter
- Job description
- Passport copy
- Right to Work evidence
- Driving licence
- CPC card
- Digital tachograph card

- Proof of address
- National Insurance evidence
- Payroll documents
- Disciplinary records
- Appraisal records
- Resignation or termination records

Home Office Sponsor Compliance

For sponsored workers, the system should include:

- Certificate of Sponsorship number
- SOC code
- Sponsored job title
- Salary stated on CoS
- Actual salary paid
- Contracted hours
- Actual working pattern
- Work location
- Visa expiry date
- Right to Work check date
- Follow-up check date
- Absence monitoring
- Unauthorised absence alerts
- Change of duties record
- Change of salary record
- Change of work location record
- End of employment report record

Home Office Alerts

The app should automatically alert management when:

- Right to Work is expiring
- Visa is expiring
- Follow-up check is due
- Sponsored worker is absent without authorisation
- Sponsored worker does not start work
- Sponsored worker leaves employment
- Salary changes
- Hours change
- Job duties change
- Work location changes
- Contact details are missing

Home Office Audit Pack

The app should generate a one-click audit pack containing:

- Staff list

- Sponsored worker list
- Right to Work checks
- Contracts
- Job descriptions
- Salary and hours records
- Absence records
- Contact details
- Reporting history
- Compliance alerts
- Management sign-offs

Module 2: Safety & Competency

This module proves that drivers and staff are trained, competent and aware of company procedures.

Training Matrix

Each employee should have a training matrix showing:

- Induction completed
- HGV driver induction
- Tachograph training
- Drivers' hours training
- Daily walk-around check training
- Defect reporting training
- Load security training
- Health and safety training
- Accident reporting procedure
- Mobile phone policy
- Drug and alcohol policy
- Fatigue management policy
- Fuel card policy
- Yard rules
- Vehicle cleanliness policy
- Customer site rules
- Manual handling training
- Fire safety training
- Refresher training dates

Signed Acknowledgements

Drivers should sign digitally to confirm:

- They understand daily walk-around check duties
- They understand defect reporting rules
- They understand tachograph rules
- They understand drivers' hours rules
- They understand fatigue management rules

- They understand mobile phone restrictions
- They understand drug and alcohol policy
- They understand accident reporting rules
- They understand that serious defects must be reported immediately

Toolbox Talks

The app should allow short safety briefings to be issued, such as:

- Winter driving
- Tyre safety
- Bridge strikes
- Load security
- Mobile phone use
- Tachograph infringements
- Fuel theft prevention
- Yard parking rules
- Speeding and penalties

Each toolbox talk should show:

- Date issued
- Topic
- Staff assigned
- Staff signed
- Staff not signed
- Manager sign-off

Training Alerts

The system should alert when:

- Induction is incomplete
- Refresher training is due
- CPC card is expiring
- Driver has repeated infringements
- Driver has repeated defects
- Driver has missed safety briefings
- Driver has not signed a policy

Module 3: Fleet & Roadworthiness

This is the DVSA-focused part of the app.

Vehicle Profile

Each truck should have a full profile containing:

- Registration number
- VIN/chassis number
- Make and model
- Year
- Operator licence disc number
- MOT expiry date
- Road tax expiry date
- Insurance expiry date
- Tachograph calibration expiry
- PMI interval
- Last PMI date
- Next PMI date
- Current mileage
- Assigned driver
- Current status: Active, VOR, Sold, Hired, Awaiting Repair

Maintenance Records

Upload and track:

- PMI sheets
- Brake test reports
- MOT certificates
- Service invoices
- Repair invoices
- Tyre reports
- Tachograph calibration certificates
- Safety inspection sheets
- Roadside inspection reports
- Prohibition notices
- Rectification evidence

PMI Planner

The app should automatically show:

- Next PMI due
- PMI overdue
- PMI completed
- PMI booked
- Vehicles without PMI date
- Vehicles with missing inspection sheets
- Vehicles with missing brake tests

Daily Walk-Around Checks

Drivers should complete daily checks on the app before using the vehicle.

Checklist should include:

- Tyres and wheel nuts
- Lights and indicators
- Brakes
- Steering
- Mirrors
- Windscreen and wipers
- Horn
- Number plates
- Bodywork
- Fuel and AdBlue
- Warning lights
- Tachograph
- Load security
- Leaks
- Coupling, if trailer used
- Fifth wheel
- Mudguards
- Reflectors

Each check should capture:

- Driver name
- Vehicle registration
- Date and time
- Location
- Mileage
- Defects found or nil defect
- Photos where required
- Driver signature

Defect Management

When a defect is reported, the app should create a defect case.

Defect case should show:

- Vehicle registration
- Driver name
- Date and time reported
- Defect category
- Description
- Photos
- Severity: Minor, Serious, Dangerous
- Vehicle allowed to continue: Yes/No

- VOR decision
- Transport Manager review
- Repair action
- Invoice upload
- Date repaired
- Final sign-off

VOR Management

The system should record:

- Vehicle taken off road date
- Reason for VOR
- Person who authorised VOR
- Repair garage
- Estimated return date
- Actual return date
- Evidence uploaded
- Transport Manager sign-off

DVSA Audit Pack

The app should generate a DVSA audit file showing:

- Fleet list
- Vehicle maintenance planner
- PMI history
- MOT status
- Brake test evidence
- Defect reports
- VOR history
- Daily walk-around checks
- Driver training records
- Tachograph training records
- Maintenance provider details
- Management sign-offs

Module 4: Driver Risk Management

This module helps identify weak drivers before they become a serious compliance risk.

Driver Risk Score

Each driver should have a score based on:

- Tachograph infringements
- Missed walk-around checks
- Reported defects

- Accidents
- Speeding records
- Customer complaints
- Licence points
- Late training
- Policy breaches

Driver Debrief Records

When a driver has an infringement or issue, the app should record:

- Issue date
- Type of issue
- Driver explanation
- Manager comments
- Corrective training issued
- Driver signature
- Follow-up date

Driver Compliance Alerts

The app should alert management when:

- Driver licence check is due
- CPC card is expiring
- Tacho card is expiring
- Driver has repeated infringements
- Driver has repeated missed checks
- Driver has accident history
- Driver has not completed debrief

Module 5: Audit & Legal Evidence Centre

This is where the app becomes stronger than normal HR software.

Evidence Folders

The app should have ready-made folders for:

- Home Office Sponsor Licence Audit
- DVSA Maintenance Investigation
- Traffic Commissioner Public Inquiry
- Insurance Claim Evidence
- Accident Investigation
- Employment Dispute
- Driver Disciplinary File

Audit Trail

Every important action should be logged:

- Who uploaded a document
- Who signed a policy
- Who closed a defect
- Who changed a worker record
- Who marked training complete
- Who approved a VOR return
- Date and time of action

Management Sign-Offs

Certain records should require sign-off from:

- Director
- Transport Manager
- HR Manager
- Operations Manager
- Yard Manager

User Roles

Director

Full access to all modules and reports.

Transport Manager

Access to:

- Fleet records
- PMI planner
- Defects
- VOR
- Driver risk
- Training records
- DVSA audit pack

HR Manager

Access to:

- Employee records
- Right to Work
- Contracts

- Absence
- Training records
- Home Office audit pack

Operations Manager

Access to:

- Driver allocation
- Vehicle status
- Defects
- Training status
- Driver risk dashboard

Driver

Limited access to:

- Own profile
- Daily walk-around checks
- Defect reporting
- Training tasks
- Policy acknowledgements
- Toolbox talks

Garage / Maintenance Provider

Limited access to:

- Assigned defects
- PMI uploads
- Repair evidence
- Invoice upload
- Completion notes

Suggested App Menu

1. Dashboard
2. People & Compliance
3. Sponsored Workers
4. Training & Competency
5. Fleet & Roadworthiness
6. Daily Checks
7. Defects & VOR
8. Driver Risk
9. Audit Evidence Centre
10. Reports
11. Settings

Reports Section

Home Office Reports

- Staff list
- Sponsored worker records
- Right to Work report
- Absence report
- Salary and hours report
- Change reporting log
- Document expiry report

DVSA Reports

- Fleet list
- PMI planner
- PMI history
- Defect report
- VOR report
- MOT expiry report
- Brake test report
- Daily walk-around report
- Driver training report

Management Reports

- Compliance score
- Overdue actions
- Open risks
- Driver risk ranking
- Vehicle risk ranking
- Monthly compliance summary

Compliance Scoring System

The app should give 256 Logistics a live compliance score.

Example Score Categories

People Compliance Score

Based on:

- Complete employee records
- Right to Work checks
- Contract records

- Absence monitoring
- Sponsored worker compliance

Fleet Compliance Score

Based on:

- PMI compliance
- MOT compliance
- Defect closure
- VOR control
- Brake test evidence

Driver Compliance Score

Based on:

- Training completion
- Tachograph behaviour
- Walk-around checks
- Licence checks
- Debriefs

Overall Compliance Score

A combined score showing the overall health of the business.

Example Dashboard Alerts

- FN16 EVK PMI due in 5 days
- NU66 XVB MOT expires in 21 days
- Driver CPC expiring soon for assigned driver
- Sponsored worker Right to Work follow-up due in 30 days
- 3 drivers have not signed the new mobile phone policy
- WX18 NEO has an open defect not closed
- BW18 DXL has missed daily checks for 2 days
- One driver has repeated tachograph infringements
- Home Office audit pack is 82% complete
- DVSA audit pack is 76% complete

Best Final Positioning Statement

256 Logistics Compliance Hub is a transport-focused HR, training and fleet compliance platform designed to help UK HGV operators manage staff, sponsored workers, drivers, vehicle maintenance, roadworthiness, defects, training evidence and audit readiness in one system.

The system is built to support:

- Home Office sponsor licence compliance
- DVSA roadworthiness expectations
- Traffic Commissioner evidence
- Internal management control
- Driver accountability
- Fleet safety
- Legal defence evidence

Strong Development Recommendation

The app should first be built as a Minimum Viable Product with these 5 core areas:

1. Employee records
2. Right to Work and sponsor compliance
3. Training records and digital signatures
4. Vehicle profiles and PMI planner
5. Daily checks, defects and VOR management

Once the basic system works, the advanced features can be added:

- Tachograph integration
- Driver risk scoring
- AI compliance alerts
- Garage portal
- Home Office audit export
- DVSA audit export
- Payroll integration
- Mobile app for drivers
